Summary

Highly motivated MERN Stack Developer with strong knowledge of MongoDB, Express.js, React.js, and Node.js. Well-versed in developing responsive and scalable web applications, RESTful APIs and database management. Strong knowledge of JavaScript, HTML5, CSS3, Bootstrap, Git and MongoDB. Quick learner with good analytical and problem-solving skills. Seeking an entry-level Software Developer or MERN Stack Developer role where I can contribute to innovative projects while continuously improving my technical skills.

Professional Experience

MERN Stack Developer Intern | GT Software | Coimbatore, Tamil Nadu | Jun 2026 - Present

- Developed and maintained responsive web applications using React.js, Node.js, Express.js, and MongoDB, following Agile practices
- Designed and integrated 10+ RESTful APIs, enabling seamless communication between frontend and backend applications.
- Built reusable, modular React components, reducing development time for new features by 20%
- Managed MongoDB databases including CRUD operations, indexing, and aggregation pipelines
- Collaborated with cross-functional teams to design, test, and deploy features across sprint cycles
- Debugged and resolved 15+ production issues while following Git-based version control and code review best practices

Skills

Frontend Technologies

React.js, Bootstrap, JavaScript (ES6+), HTML5, CSS3

Databases

MongoDB

Soft Skills

Problem Solving , Time Management , Quick Learner , Adaptability

Backend Technologies

Node.js, Express.js , Java (Basic)

Tools

Git, GitHub, VS Code, Postman

AI Tools

Claude, GitHub Copilot, Antigravity, Stitch, Lovable, ChatGPT

Projects

HireHub – Job Portal

- Developed a full-stack job portal with role-based authentication and authorization for Candidates, Recruiters, and Admins, including secure RESTful APIs for users, jobs, applications, saved jobs, profiles, and administration.
- Implemented candidate and recruiter functionalities including profile management, resume/profile photo uploads, job search, job applications, saved jobs, interviews, company management, job posting, and applicant tracking.
- Developed admin functionality for managing users, jobs, companies, and overall platform activities with secure role-based access control.
- Implemented real-time messaging using Soclet.IO and MongoDB, along with JWT authentication and Multer-based file uploads for secure and real-time application functionality.
- Technologies: React.js, Node.js, Express.js , MongoDB, JWT, Socket.IO , Multer , Axios

Online Hospital Management

- Developed an Online Hospital Management Web Application where users can create an account and book an appointment based on their medical condition.
- Key Features: Patient Information, Room Availability, Staff Scheduling, Operating Room Scheduling, Doctor Scheduling, Online Payments, and Invoice Management.
- Tech Stack: HTML, CSS, JavaScript, BootStrap.

Education

Bachelor of Technology in Information Technology (CGPA: 7.7/10),
KSR Institute for Engineering and Technology

2022 – 2026
Tiruchengode, Namakkal

ACHIEVEMENTS

- Solved **50+ algorithmic and coding problems** on **LeetCode**, focusing on efficient problem-solving techniques.
- Completed **100+ practice problems** on **CodingBat** to improve programming logic and coding proficiency.

Area of Interest

- MERN Stack Development
- JavaScript Development, React.js Development
- Node.js & Express.js Development
- Full Stack Web Application Development
- Real-Time Web Application Development
