

Rahul Krishnan

Java Backend Developer

+91 98765 67821 | rahul.krishnan@gmail.com | Coimbatore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Java Backend Developer with 2 years of experience in developing scalable backend applications and RESTful APIs. Skilled in **Java**, **Spring Boot**, Spring MVC, MySQL, JPA/Hibernate, and Git. Experienced in implementing authentication, database integration, API development, CRUD operations, exception handling, and building reliable backend services. Strong problem-solving and debugging skills with a focus on writing clean, maintainable, and efficient code.

TECHNICAL SKILLS

Programming	Java , SQL
Backend	Spring Boot , Spring MVC, REST APIs, JPA, Hibernate, Maven
Database	MySQL, MongoDB
Authentication	JWT Authentication, Role-Based Access Control
Tools	Git, GitHub, Postman, IntelliJ IDEA, Docker
Core Skills	Backend Development, RESTful API Development, CRUD Operations, Database Integration, API Testing, Exception Handling, Debugging

PROJECTS

Employee Management System

Java, Spring Boot, MySQL, JPA/Hibernate, REST APIs

Developed a backend application for managing employee records with secure RESTful APIs and database integration.

- Developed REST APIs for employee registration, retrieval, updating, and deletion.
- Implemented CRUD operations using Spring Boot.
- Integrated MySQL using JPA/Hibernate.
- Implemented authentication and role-based access control.
- Added employee search and data management functionality.
- Tested and debugged APIs using Postman.

E-Commerce Backend API

Java, Spring Boot, MySQL, JWT, JPA/Hibernate, REST APIs

Developed a scalable backend API for an e-commerce application supporting users, products, shopping carts, and orders.

- Developed REST APIs for user, product, cart, and order management.
- Implemented JWT-based authentication and authorization.
- Integrated MySQL database using JPA/Hibernate.
- Implemented CRUD operations for products and orders.
- Added exception handling and API validation.
- Tested APIs using Postman.
